NitroStack

3rd Place Winner — Enterprise AI & Workplace Automation

Congratulations, ZeroOne [amFOSS]!

Hi Naveen Srinivas,

We're thrilled to announce that **ZeroOne [amFOSS]** has won **3rd place** in the **Enterprise AI & Workplace Automation** track at the **Amrita University Amritapuri campus NitroStack Hackathon!**

Your hard work, creativity, and the product you built have truly impressed our judges. This is just the beginning of your journey — and we're excited to be a part of it.

PRIZE & CREDITS TIMELINE

 **Prize Money** — The cash prize will be transferred to your bank account within **30 days** of submission. You'll need to add your bank details in your Team Dashboard first (see below).

 **NitroStack Credits** — Your cloud credits will also be applied within **30 days**. Credits are split across **6 months** so you can stretch your development runway and build consistently.

 **Partnership Credits** — For partner credits, you must apply for the *Nitrostack Partnership Program* from your Team Dashboard. This helps us get your brand details for listing and issuing credits.

Here's what you need to do next:

STEP 1 — BANK DETAILS

Open your Team Dashboard → **Bank Details** tab. Add your account number, IFSC code, and account holder name. This is required to receive your prize money. *Bank details are locked once submitted and cannot be edited, so please double-check before submitting.*

STEP 2 — PARTNERSHIP APPLICATION (OPTIONAL)

Open your Team Dashboard → **Apply for Nitrostack Partnership** tab to get your startup listed on the Nitrostack partners page and unlock partner credits.

Open Team Dashboard →

Timeline: Prize money and credits will be processed within 30 days of your bank details submission.

Credits split: Your NitroStack credits are distributed equally over 6 months — so you have continuous cloud support while you grow your product.

If you have any questions about your prize or the partnership program, reach out to us at support@nitrostack.ai.

Once again, congratulations from the entire NitroStack team. We can't wait to see what you build next! 🚀
